Please turn over!

The applicant has to present the following certificates/documents (originals!) to the Service Center for International Students (SCIS):

- proofs of mandatory and elective modules and internship(s)
- matriculation certificate with valid current semester („Immatrikulationsbescheinigung“)

In addition, the applicant has to confirm the following:

I, hereby, confirm that I

- have not ultimately failed the master's examination in the study program in Distributed Systems Engineering at another academic institution within the scope of the Framework Act for Higher Education („Hochschulrahmengesetz“)

and

- have not started the master's examination process in the study program in Distributed Systems Engineering at another academic institution within the scope of the Framework Act for Higher Education and failed a module examination or the master's thesis in such process, where I would still be eligible for a reexamination under the respective institution's requirements.

Date

Applicant's Signature

Please note:

The application for defense of the master's thesis has to be submitted to the SCIS in person; certificates/documents required for admission have to be presented. The application for defense of the master's thesis has to be submitted no later than two weeks before the desired date for the defense.

To be filled out by the SCIS!

The SCIS confirms that all admission requirements have been met as stated in the examination regulations for the study course Distributed Systems Engineering and that all certificates/documents have been presented.
